

Online Faculty Development Programme

on

”Cyber Crime and Forensic Tools”

08 - 12 May, 2023

Organized by

Department of Computer Science and Engineering
Sant Longowal Institute of Engineering and
Technology, Longowal

Conducted by

National Institute of Technical Teachers
Training and Research, Chandigarh

Objectives of the Programme

The aim of this course is to train faculty members, scientists, industrial personnel, research scholars, etc. on Cyber Crimes and Forensic Tools. In this FDP, hands-on sessions on cyber forensics will be conducted. With the increasing use of technology in our daily lives, cybercrime has become a major concern for individuals, businesses, and governments alike. Cybercrime refers to criminal activities that involve the use of digital devices, networks, and technologies. This type of crime can take many forms, including hacking, phishing, identity theft, and ransomware attacks. The consequences of cybercrime can be severe, ranging from financial loss to reputational damage and legal consequences.

The fundamental principles guiding the advances in these areas will be presented. The following are the main course objectives of the course:

- To provide an overview of the importance of Cyber Security and Digital Forensics
- To enable participants to understand the Different Categories of Cyber Crimes.
- To introduce different techniques and tools used for mitigation the of cyber attacks.
- To discuss the challenges and future perspectives in cyber security research.

Resource persons

All lectures/sessions will be delivered by NITTTR Chandigarh in Online/ICT mode.
