

■ ■ Two-Day Online Workshop on Staying Safe Online: Cyber Hygiene for All

- Dates: 27th & 28th October 2025
- Time: 2:30 PM – 5:00 PM (IST)
- Mode: Online (Google Meet link will be shared upon registration)
- Register Now: <https://forms.gle/Y7imodDEjKfBn288>

Organized by:

Department of Computer Science and Engineering
Sant Longowal Institute of Engineering and Technology (SLIET), Longowal,
India (Deemed-to-be-University under Ministry of Education, Government of
India)

■ About the Workshop

- In today's digital era, cyber threats are more sophisticated than ever. This workshop aims to promote **cyber hygiene** — the simple, everyday practices that keep individuals and organizations safe online. Designed for students, teachers, IT professionals, and the general public, the sessions will deliver practical and easy-to-apply knowledge for a secure digital lifestyle.
- Every October, people across the world observe **National Cyber Security Awareness Month (NCSAM)** to emphasize the importance of staying safe online. In India, the 2025 theme — “**Cyber Jagrit Bharat**” (**Cyber Aware India**) — highlights that while cybersecurity is a national priority, its true success depends on the awareness and vigilance of every citizen.
- The campaign focuses on educating digital users about responsible online behavior and common cyber threats, while promoting preventive measures such as strong passwords, phishing awareness, and safe data handling. It also seeks to foster a culture of **cybersecurity resilience** through collaboration among government bodies, educational institutions, industries, and citizens.
- This workshop aligns with the national mission of creating a **Cyber Aware and Secure India** by conducting interactive sessions, expert talks, and awareness activities that encourage participants to stay alert, informed, and safe in the digital space.

■ Workshop Highlights

- Introduction to Cyber Security and Emerging Threats
- Cyber Hygiene: Practices for Safe Online Behavior
- Email, Social Media & Mobile Security
- Password Safety, Two-Factor Authentication & Data Protection
- Phishing, Ransomware & Malware Awareness
- Do's and Don'ts for Everyday Digital Life

■ Who Can Attend?

- Students from all disciplines
- Faculty & Staff
- IT Professionals & Researchers
- General Public interested in Cyber Safety

- Participants attending both days will receive a **Participation Certificate**.
- **Resource Persons:** Renowned Cyber Security Experts from top institutions and industry.
