Date: 27/8/26

CIRCULAR

It has been observed that the Institute ambulance is sometimes retained at the hospital after dropping off patients. As the Institute is currently functioning at full strength, the ambulance is required to remain readily available on campus for any emergency.

Therefore, all concerned are hereby instructed that whenever the Institute ambulance is taken to a hospital with a patient, the driver must return to the Institute immediately after safely dropping the patient at the hospital, unless specifically instructed otherwise by the competent authority.

The ambulance should not be kept at the hospital unnecessarily. This instruction is issued to ensure that emergency transportation facilities remain available at the Institute at all times.

All concerned are requested to strictly comply with the above instructions.
